Comment text:

I am a resident in Apley and also a Landscape Architect with significant experience in assessing townscape locations and creating Strategic spatial strategies for areas. I object to the proposal to combine Apley and Leegomary ward areas on the basis that they are areas that have very different characters in terms of their townscape, open space, spatial planning and development age. Also there are very different demographics regarding who live within the areas and therefore their needs from a maintenance, social need and general planning should not be combined as 1. Keeping them separate would better and more accurately represent the 2 different communities that are here.
