Regarding Bishop's Castle division

Making this division over 100 square miles would be very challenging can we suggest that the divisions are 75 not 74

The Division current size and area covered is determined by natural geographic features such as the Long Mynd and is co terminus with existing parish councils which are all small rural parishes and a natural community of interest.

It would be a shame to destroy this and would weaken the democratic process and local political representation.

Ms Janet Cobb
Parish Clerk
Edgton Village
South Shropshire
